

1) Diverse sampling on a Seq2Seq model

2) Plan-based approach. (well planned - - - - -) TBD

3) Refill

(y, x) ← F_{θ}
product descriptions

$$D = \{(x_i, y_i)\}$$

4)

To do:

- 1) Clean up prod. description ($\leq 20\%$) — Train seq2seq model.
- 2) Familiarize with data
- 3) Think about retriever and template generator models.
- 4) Explore related work [Ashutosh].
